

iPhone 7 release date, specs, price and other news

The rumors about [iPhone 7 release date](#) have been surfacing around the world and it is being predicted that the this premium device could be launched in Q4 of the year 2016. There is no clear understanding whether the new iPhone will be only iPhone 7 or iPhone 7 Plus too as some of reliable sources believe it will be iPhone 7 and some other think the tech giant may release iPhone 7 Plus as well just like iPhone 6 and 6 Plus.

iPhone 7 is the most anticipated device of the year 2016 that I believe, could make debut any time in winters just like iPhone 6S. The phone will be slightly larger than its predecessors and will be having other ultra advanced technology. Since the Cupertino, California based tech giant releases new iOS just before the launch of next generation iPhone, it is anticipated that the new iPhone, i.e. iPhone 7 gonna feature latest operation system with plenty of new interesting features, new UI, smarter SIRI, ultra fast processor and improved camera for clicking sharper pictures.

iPhone 7 release date

If we talk about the siblings of iPhone 7, Apple followed a set pattern for their release but a few of them were released at completely different time. If apple gonna follow the same cycle as it used for iPhone 5 and 5S, 5C, iPhone 6 and 6 Plus, [iPhone 6S](#) we can anticipate that the release date of iPhone 7 will fall sometimes in September 2016.

Also see: [iPhone 7 Plus release date](#)

The first iPhone was released in 2007 and it was the most hyped consumer product followed by release of iPhone 3G, iPhone 3G S, iPhone 4, iPhone 4S, iPhone 5, [apple iPhone 5S](#) and 5C, iPhone 6, 6 Plus and now iPhone 6S. Have a look at the release dates of different iPhones.

<i>Model name</i>	<i>Release date</i>
<i>iPhone</i>	<i>June 2007</i>
<i>iPhone 3G</i>	<i>June 2008</i>
<i>iPhone 3G S</i>	<i>June 2009</i>
<i>iPhone 4</i>	<i>June 2010</i>
<i>iPhone 4S</i>	<i>October 2011</i>
<i>iPhone 5</i>	<i>September 2012</i>
<i>iPhone 5S and 5C</i>	<i>September 2013</i>
<i>iPhone 6 and 6 Plus</i>	<i>September 2014</i>
<u><i>iPhone 6S</i></u>	<i>September 2015</i>
<i>iPhone 7 and 7 Plus</i>	<i>September 7, 2016</i>

So if we look at the pattern that Apple is following, the first four generation iPhone was released in June month of each year with just one add release of iPhone 4S that was taken place in October 2012. The reason behind for the delay was that iPhone 4 was a huge success and the company didn't wanted to bring new iPhone in the market.

After that tech giant follow ed different cycle wherein all the new iPhone were being released in the month of September. every year. So assuming Apple going to follow same pattern for iPhone 7 as well, I can project the [iPhone 7s](#) release date will fall sometime during September 2016 however it again depend on the company's strategies when they want to launch new iPhone in the market.

iPhone 7 specifications

As far as specification is concern, there is not much news about it however since very new iPhone (except S's and C's versions) are launched with latest iOS. So iPhone 7 will going to feature new OS i.e. iOS 10 which possibly be announced latest by September 2016.

If we talk about the screen size, the device is going to feature a little bigger screen than its predecessors i.e. iPhone 6 and 6 Plus which measure screen size of 4.7 and 5.5 respectively. Therefore the new iPhone will probably feature 5.8 screen size with OLED display. As far as camera is concern, iPhone 7 will sport improved 13 megapixel primary iSight camera with 8 megapixel secondary one.

iPhone 7 price

With all these advanced features, I can anticipate the price of [iPhone 7](#) may fall between the price range of 800-900 USD depending upon different locations and GB memory. The Phone could be available in contract with mobile carriers but at this point of time it is pretty hard to predict which carrier will have the privilege. With contract, the consumer will have to spend a couple of hundred dollar initially and rest can be paid in due course as contract lasts. Below are the tentative price of iPhone 7 in different countries.

Model	Storage	USA	UK	Australia
iPhone 7	32 GB	\$649	£599	AU\$1079
	128 GB	\$749	£699	AU\$1229
	256 GB	\$849	£799	AU\$1379
iPhone 7 Plus	32 GB	\$769	£719	AU\$1269
	128 GB	\$869	£819	AU\$1419
	256 GB	\$969	£919	AU\$1569
